Assign members to teams		
	Use	UC21
	Case ID	
	Brief	There are two opportunity how to add a
	_	<b>one</b> mber of all teams. If the member is
		registered the organizer use his/ her email
		to find him/ her. If the future member is
	l I	
		not registered the organizer has to fill an
		email in and then the invitation will be send.
		Registered member can a possibility to
		access or refuse immediately. The system
		gives non-registered ones a possibility
		to register and then accept or refuse an
		invitation.
	Primary	Organizer
	Actors	
	Seconda	<b>M</b> embers of organizational team, members
	Actors	of program teams
	Precondi	Organizer is signed in
	tions	
	Main	Organizer searches for the future
	Flow of	member in the system
		2. If the future member has account in the
		system, continue main flow, otherwise start
		alternative flow 2.1
		3. If the future member accepts invitation,
		he/she becomes member of particular team,
		if he/she declines, organizer is notified
	11	about this
		<b>2</b> 21 If the future member does not have an
		account, he or she is sent invitation link via
	FIOWS	· ·
		e-mail
		2.2 After he or she creates account, return
		to main flow, point 3

### **Description**

**Use Cases:** 

### **Organizer**

- 1) Create conference
- 2)Specify deadlines
- 3) Nominate members of project and organization teams
- 4) Specify available rooms
- 5) Specify registration fees
- 6) Specify lengths of presentations
- 7)Generate conference schedule

### **Program team members**

- 8)Comment presentation drafts
- 9)Rate presentations

### Manager of program team

10)Accept/ refuse presentation

### **Authors/ speakers**

- 11)Choosing and joining a conference
- 12) Actualization and changing drafts
- 13)Possibility to read comments
- 14)Upload final version

### **Guests and participants**

- 15)Pay
- 16)Take part a conference
- 17) Possibility to see slides and records
- 18) Give feedback and comments

#### Non-functional requirements:

- 1)UI created by HTML, CSS, jQuery
- 2)Back-end created using PHP, framework Laravel
- 3)Database system MySQL
- 4)Be able to handle more users immediately before deadline
- 5)Back up every day
